INTRODUCTION

School of Medicine was established in the year 2003 to produce graduate doctors and graduates in health sciences to cater to the professional human resource needs and health experts in Malaysia and BIMP-EAGA area. It was changed to Faculty of Medicine and Health Sciences in the Year 2014. Approach to learning and teaching in the faculty is to educate graduates for the twenty first century who are caring, competent, noble in character, understand the values of and are sensitive to the local cultural life. In addition to realizing our academic excellence, research and innovation, the graduates will be exposed to critical thinking, be competent and progressive with the ability to work in harmony with the health sector and other related sectors. Faculty of Medicine and Health Sciences is committed to forge ahead and develop strategies to become a centre of excellence in research and service in the region.

OBJECTIVES

- To produce doctors that have ability to provide safe, competent and contextualized care to the patients
- To inculcate doctors that have ability to adapt and provide relevant services in various healthcare settings
- To produce human capital that has the ability to share and advance knowledge and skill locally and internationally
- To indoctrinate an individual that strive towards lifelong learning

AIMS

- To produce graduates who are highly skilled, responsible and have a holistic approach to knowledge in the field of medicine and health sciences of the twenty-first century.
- To produce professionals, scientist, leaders and pioneers in the field of medicine and health sciences with ethical and moral values to meet the needs of the public service, private sector, and community.
- To become a distinguished faculty in teaching and learning medicine and health sciences, health services, research and

FACULTY OF MEDICINE AND HEALTH SCIENCES

innovation in the region.
